### PART III: REQUESTOR'S POSITION SUMMARY

Position summary of July 8, 2003 states, "... TMIC paid the claim at per diem, and the implants were not paid at all. We contend that the entire claim, including implants, should have been paid at stop-loss..."

# PART IV: RESPONDENT'S POSITION SUMMARY

Position summary of July 7, 2003 states, "... This dispute nvolves this carrier's payment for dates of service for which the requester charged \$124, 264.70 for a 7 day inpatient hospital stay for services that were not unusually extensive or costly..."

# PART V: MEDICAL DISPUTE RESOLUTION REVIEW SUMMARY, METHODOLOGY, AND/OR EXPLANATION

This dispute relates to inpatient services provided in hospital setting with reimbursement subject to the provisions of Rule 134.401 (Acute Care Inpatient Hospital Fee Guideline). The hospital has requested reimbursement according to the stop-loss method contained in that rule. Rule 134.401(c)(6) establishes that the stop-loss method is to be used for "unusually costly services." The explanation that follows this paragraph indicates that in order to determine if "unusually costly services" were provided, the admission must not only exceed \$40,000 in total audited charges, but also involve "unusually extensive services."

After reviewing the documentation provided by both parties, it **does** appear that this particular admission involved "unusually extensive services." In particular, this admission resulted in a hospital stay of 7 days. The operative report of September 25, 2002 indicates the patient underwent "... 1. Decompression L4-L5 to the lateral gutter and diskectomy. 2. Lumbar laminectomy L5-S1 with diskectomy L5-S1. 3. Interbody fusion L5-S1 10 x 20 mm bone bilaterally. 4. Interbody fusion L4-L5 10 x 20 mm bilaterally. 5. Posterolateral fusion L4-L5, S1. 6. Interbody fusion with Forex internal fixation with 5 x 45 mm at L5 and L5 and 6 x 35 mm at S1 bilaterally. 7. Application of EBI internal bone stimulator. 8. Application of DBM and application of a coral bone...". Accordingly, the stop-loss method does apply and the reimbursement is to be based on the stop-loss methodology.

In determining the total audited charges, it must be noted that the insurance carrier has indicated some question regarding the charges for the implantables. The requestor billed \$93,940.80 for the implantables. The carrier paid \$16,092.29 for the implantables. The key issue is what amount would represent the usual and customary charges for these implantables in determining the total audited charges. The requestor provided the Commission with documentation on the actual cost of implantables, \$5,660.00. The requestor provided a document from EBI Company (Invoice Date, 5-11-01), in the amount of \$4,515.00. The Commission is not able to associate this document with this patient. Therefore, the total amount due, \$4,515.00 is not considered in this dispute.

Based on a review of numerous medical disputes and our experience, the average markup for implantables in many hospitals is 200%. This amount multiplied by the average mark-up of 200% results in an audited charge for implantables equal to \$11,320.00.

The audited charges for this admission, excluding implantables, equals \$30.323.90. This amount plus the above calculated audited

(75%) results in a workers' compensation reimbursement amount equal to \$7,184.99 (\$31,232.93-\$24,047.93 (amount paid by respondent)).  Based on the facts of this situation, the parties' positions, and the application of the provisions of Rule 134.401(c), we find that the health care provider is entitled to a reimbursement amount for these services equal to \$7,184.99.  PART VI: COMMISSION DECISION AND ORDER  Based upon the review of the disputed healthcare services, the Medical Review Division has determined that the requestor is entitled to additional reimbursement in the amount of \$7,184.99.
